KEY POINTS IN THE TRANSITION PROCESS

Alignment: IEP and IPE alignment facilitates a seamless service delivery process.

#1	Individualized Education Program	Participate in your IEP or child's IEP development to ensure that transition services are addressed in your child's IEP by age 16 (or earlier, depending on your state's laws). Students with disabilities and their representative are critical members of the IEP Team and have valuable information that is needed for quality transition planning.
#2	Be Familiar with the Steps to Transition Planning	Schools should: <ol style="list-style-type: none"> 1. Invite student; 2. Administer age appropriate transition assessments; 3. Determine needs, interests, preferences, and strengths; 4. Develop postsecondary goals; 5. Create annual goals consistent with postsecondary goals; 6. Determine transition services, including course of study needed to assist your student in reaching those goals; 7. Consult other agencies, in particular, the VR agency; and 8. Update annually.
#3	Implementation of Transition Services	Provide transition services as identified in the IEP. Pre-employment transition services are provided under the <i>Rehabilitation Act</i> . Alignment of the IEP and IPE facilitates a seamless service delivery process.
#4	Referral to VR and/or Other Adult Agencies	<ol style="list-style-type: none"> 1. Pre-employment transition services provided under the <i>Rehabilitation Act</i>, as appropriate; 2. Familiarize yourself with laws relating to other programs; and 3. Learn about community agencies that provide services to support students, such as travel training and daily living skills.
#5	VR Application Process	<ol style="list-style-type: none"> 1. Share employment interests and capabilities during the intake interview. 2. Focus on assessment(s) to lead to the student's postsecondary goals.
#6	Individualized Plan for Employment	Once a student has been determined eligible for VR services, the IPE must be developed and approved within 90 days, and no later than the time student leaves the school setting.
#7	Common VR Services Available under the Rehabilitation Act	<ol style="list-style-type: none"> 1. Transition services; 2. Vocational counseling; 3. Vocational training; 4. Postsecondary education; 5. Supported employment services; 6. Career development; and 7. Job placement.
#8	VR Service Record Closure	As a result of the student or youth with disability: <ol style="list-style-type: none"> 1. Achieving an employment outcome; or 2. No longer pursuing an employment outcome and, therefore, determined ineligible for VR services.
