# What is Screencasting?

## *Screencasting is:*

*A digital recording of computer screen output, also known as a video screen capture, often containing audio narration. The term screencast compares with the related term screenshot; whereas screenshot is a picture of a computer screen, a screencast is essentially a movie of the changes over time that a user sees on a computer screen, enhanced with narration.*

How might I use it?

## Why Screencast?

- ✗ Record procedures and answers to common questions.
- ✗ Record lessons that students can access anytime or anywhere.
- ✗ Make a video to help your substitute teacher if you have to miss class.
- ✗ Provide professional development for the future.
- ✗ Give students audio - visual feedback (next best thing to a 1:1 conversation).
- ✗ ???

*Thinking that's what*

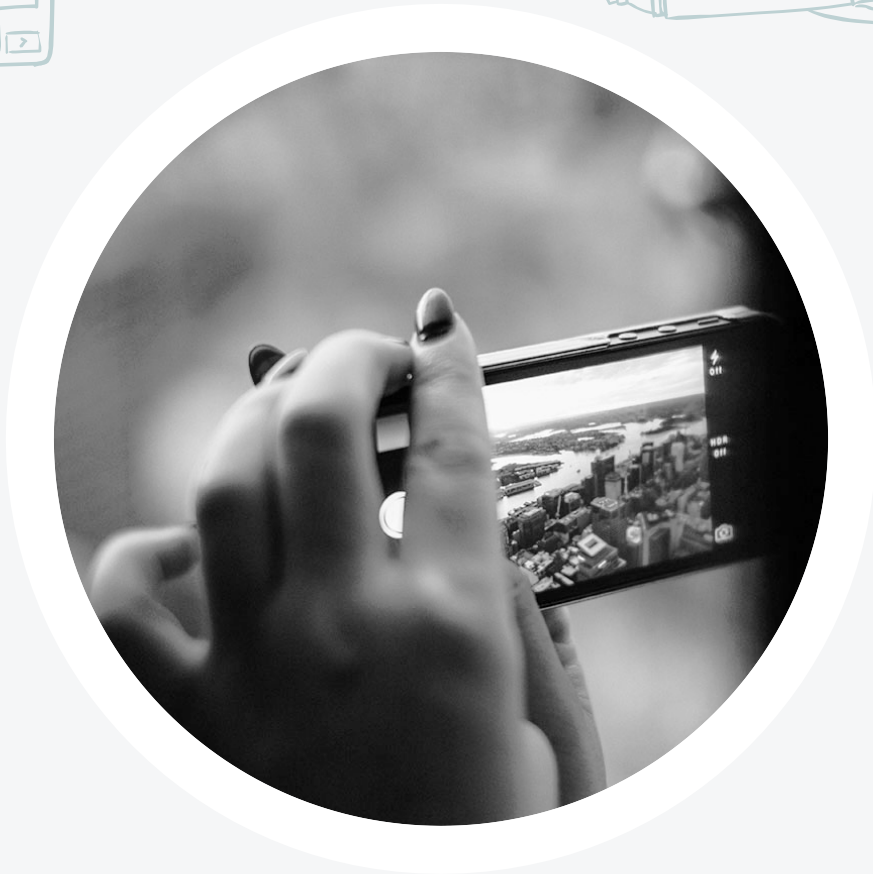

Staying in a foreign country when one is young and willing to learn is a very rewarding experience. *The experience is in* Suppose a young person came to U.S.A. from Japan and stayed for five years, *his experience can* his experience can be divided into three main periods.

*During this* The first few months can be called a period of happy ignorance. *period of happy ignorance* Taking ~~an example in the way of communication,~~ since he can not speak English well enough, he may try to overcome the barrier by more smiling; *in doing so* ~~unconsciously,~~ he is *wasting* his energy. In *the* ~~period~~ *period* he may write to home telling that he is having a wonderful time. Actually *he is experiencing* a kind of blind excitement over something new coupled with the unconscious yet strained efforts to communicate.

The second period comes soon enough. A kind of *imperceptible* ~~unnoticeable~~ tension seems to grow *at* him. Something disturbs him but he can not tell what it is exactly. For example, women's voice ~~generally~~ sounds too harsh and gruff, ~~as a particular reaction.~~ Whenever he is given a flat answer "no" he feels exposed, thinking that he may have committed a ~~social~~ *crime*. *loss* He ~~is~~ not smiling *as* much as before, not because his English is improved but because he begins to realize that too much gentleness can be considered ~~as~~ a sign of a weakness and people may take advantage of him. He is more self assertive than before. However, the mere change of ~~his~~ habits is a strain. Unlike the first period, this is an unhappy trial with a constant strain.

*not so good!* The third period is the most mature *since and* ~~is~~ called a happy compromise. Some ~~people~~ may never reach *it* ~~the~~ *give up* ~~the~~ *stage* at the second stage. Only after the fourth or fifth year of *one day does one* ~~immersion~~ *one* begins to see pro and con of two different cultures. *the given* ~~He~~ *now* ~~is~~ accustomed to the pitch and rhythm of American talking. He
